SKILLS

PROGRAMMING

Advanced:

- HTML • CSS • Tailwind CSS
- React JS • Javascript • Redux-RTK
- APIs • Git

Intermediate:

- Python • MySQL

ACHIEVEMENTS

ACADEMICS

District-Level Centum in Science:

Achieved a perfect score of 100% in SSLC Science.

CERTIFICATION

Python Certification: SLA Placements,
Chennai

EXPERIENCE

SYARKS | JUNIOR FRONTEND DEVELOPER

Dec 2023 - March 2024 | Bangalore | Karnataka

- Crafted a responsive and intelligent UI for a website connecting customers with professional service providers, seamlessly integrating backend APIs; boosted user interaction by **35%** and improved service matching efficiency by **30%**.
- Leveraged **Redux Toolkit (RTK)** for state management, achieving a **20%** reduction in application load times and restructured user interaction responsiveness, while **troubleshooting** and **fixing frontend bugs** to ensure smooth operation and optimal performance.

DECISION MINDS | FRONTEND DEVELOPER INTERN

Dec 2022 - Oct 2023 | Chennai | Tamil Nadu

- Built a user-friendly web application using React.js, enhancing user engagement and satisfaction.
- Worked with **RESTful APIs** to retrieve and display data from databases, improving data retrieval efficiency by **25%**. We achieved this by optimizing **API integration** and implementing efficient data fetching techniques, enhancing the application's overall performance.
- Converted various data **formats to JSON** for seamless integration, achieving a **30%** improvement in data processing efficiency. Stored and managed this data in Snowflake

PROJECT

SWIGGY-LIKE FOOD DELIVERY PLATFORM | SOURCE CODE

HTML | Tailwind CSS | javascript | React Js | Redux Toolkit

- Developed a responsive food delivery web app using React.js, incorporating design principles to ensure an optimal user experience across both browsers and mobile devices, enhancing overall efficiency.
- Implemented **lazy loading**, which resolved application performance by reducing initial load times by **25%** and optimizing resource utilization.

NETSTREAM CLIENT APPLICATION | SOURCE CODE

HTML | Tailwind CSS | javascript | React Js | Redux Toolkit

- Implemented **Firebase Authentication** to manage user sign-up, login, and security, ensuring a secure and seamless user authentication experience.
- Added **multi-language support** and **GPT-based** movie search functionality, fetching suggestions from **TMDB** and **GPT APIs** for a more interactive experience.
- Established memoization and **custom hooks** for efficient data fetching and rendering, leading to a **30% improvement** in page load times.

VIDHUB VIDEO SHARING PLATFORM | SOURCE CODE

HTML | Tailwind CSS | javascript | React Js | Redux Toolkit

- Integrated **YouTube's most popular video APIs** to fetch and display trending videos, ensuring up-to-date and relevant content.
- Optimized search suggestion algorithm with advanced **debouncing methods**, cutting down extraneous queries and boosting page load speed by **30%**, leading to a smoother and faster user interface.
